## Waterproofing Multi Panels

Products required

- MAXSEAL FLEX
- MAXMESH

<u>Method</u>

- 1. Prepare area to be treated by removing any loose materials ensuring a clean and sound surface. If surface previously painted all paint must be removed.
- Wet and coat joint area with MAXSEAL FLEX, according to product specifications and place 50mm reinforcing MAXMESH incorporating it into the first coat of MAXSEAL FLEX. Allow to cure over night.
- 3. Wet surface and apply a coat of MAXSEALFLEX at the rate of 1kg/m2 and ensure coverage over entire area..
- 4. Leave for minimum of 4 hrs or maximum of overnight before placing topping.
- 5. As soon as topping can be walked on, wet surface, apply a coat of MAXSEALFLEX at the rate of 1kg/m2 .
- 6. Wet surface and apply second coat of **MAXSEAL FLEX**, over entire area (at 1kg/m2) according to product specifications. (not less than 14 hrs)
- 7. Leave for 5 days minimum prior to application of other finishes or processes..
